## A 2 Day IntelTrac Readiness Session

The IntelTrac Assessment Program is designed to provide you with an accurate understanding of your site's readiness for an IntelTrac implementation. This 2 day program includes system sizing, scoping, team requirements and scheduling, providing your organization with a road map for all activities which need to be addressed to provide the best opportunity for an accelerated and successful implementation. In addition, site readiness is also evaluated based on the information content presently available. Any implementation gaps which may exist, with regard to any of the above, are identified along with the approach to closing out the gaps, insuring a thorough installation approach.

The IntelTrac Assessment Program is offered by Wonderware Professional Services and key Wonderware Services Partners certified on the most current versions of IntelTrac. The Wonderware Professional Services Organization includes highly experienced IntelTrac Consultants, the majority of whom have more than 6 years of successful enterprise mobile systems implementation experience across process industries.

## IntelTrac Assessment Program Methodology

### A Site Readiness Evaluation

- Assessment of the status of equipment / asset lists
- Evaluation on the completeness of rounds (reliability, environmental, etc.) as they exist today
- Determination of quality of information supplied by inspections

### A 2.5 Hour Workshop - *Structured Equipment Surveillance*

- Converting current knowledge pockets into institutional wisdom
- Identifying criteria for information collection
- Establishing a protocol for collection frequency and review of information
- Determining the needs of information consumers - "who needs what reports"
- Learning the basics for response list creation and pre-defined notes

### The Activity Road Map

- Practical architecture
- System sizing
- Implementation team
- Setting a plan to get answers to questions raised in the workshop
- Asset identification
- Managing Rounds, Assets and Tasks
- Strategy to rollout IntelTrac

The final deliverable of the IntelTrac Assessment Program is a report which addresses each of the items above. With this report, you will have a best practice approach, tailored to your site, for the implementation of the IntelTrac system.
